The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/563,092	Applicant(s) JUEN, REINHOLD	
	Examiner Haissa Philogene	Art Unit 2821	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

The drawings are objected to because Figures 6 and 7 should be labeled as – Prior Art—instead of “state of the art”. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: In page 1, line 4, insert –FIELD OF THE INVENTION—and in line 11, insert --BACKGROUND OF THE INVENTION--.. In page 4, delete text in lines 1-4 and in line 5, insert --SUMMARY

OF THE INVENTION--. In page 7, line 15, insert --BRIEF DESCRIPTION OF THE DRAWINGS--. In page 8, line 8, insert --DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT--. In page 9, line 11, change "3" to --12--. Appropriate correction is required.

Claim Objections

Claims 8 and 12-14 are objected to because of the following informalities: In claim 8, line 3, change "the" before "idle" to --an--. In claim 12, line 10, change "the" before "voltage supply" to --a--. In claim 3, line 5 and claim 13, line 5, change "the" before "mains voltage" to --a--. In claim 4, line 3 and claim 14, line 3, after "mains" add --voltage-- . Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Foster, Patent No. 6,762,570.

Foster discloses in Fig. 1 an Interface (104) for a lamp operating device (106-108, see also Fig. 2) comprising at least one input-side signal terminal (138) for the connection of a bus line (DALI bus), and an evaluation logic (102) for the processing of signals present at the at least one input-side terminal via interface (104) and for the generation of output-side signals (122) for the control of the lamp operating device wherein, the evaluation logic (102) has a voltage supply (bus voltage, i.e. when the DALI bus has no signaling information) independent of the mains voltage supply (136) of the lamp operating device

wherein, the evaluation logic (102) is supplied with voltage of the at least one input-side signal terminal 138 (bus voltage, i.e. when the DALI bus has no signaling information) via the interface .

Allowable Subject Matter

Claims 1-8 and 11-18 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose the following recited limitations “the evaluation logic is arranged on a side of the electrical isolation element towards the at least one input-side terminal” (claim 1) and “transmission of the processed control signals by means of an electrical isolation element to the lamp operating device (claim 12) .

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Veskovic et al., Patent No. 2005/0179404; Rahamin, Patent No. 6,081,586;
Ribarich et al., Patent No. 6,771,029; Eckel et al., Patent No. 6,388,399.
